Narrative of the beneficiary

“I am herding my livestock alongside my parents. Last winter, I lost my goat called “white coddle” which I’d looked after since I was young. I was emotionally depressed by this loss and my parents were depressed for their huge loss as well. However, with the livestock support provided by the Save the Children, my family is more hopeful about continuing herding. All of us are really encouraged and are positive about our future now.”

Jambalsuren, 16 years old boy
